

PRODUCTS OVERVIEW

TRIMMERS

C0

Ideal for espalier

It performs at best between 5-30 ha.

We suggest the complete version as it has all hydraulic movements and it is simpler to set the machine

It is perfect for tractors with no cab. If with cab we suggest to have it with our joystick.

If the foliage is higher than 1,6 mt we suggest to add a knife to have a 2 mt vertical cut.

It works very fast with a speed between 7-8 Km/h.

We suggest to buy the stand/resting platform.

C2

Ideal for espalier

It performs at best between 20-70 ha.

The customer should verify that all the stakes/posts/poles all are of the same heights to prevent impacts.

We suggest the complete version as it has all hydraulic movements and it is simpler to set the machine

It is perfect for tractors with no cab. If with cab we suggest to have it with our joystick.
